What is All-In-One Services?

Notel is your single-source carrier liaison for all of your adaptive and reliable voice and IT services. No need to have several services from several providers with several payments to make each month. Notel will take care of all of them, with one source for support and one low payment to make each month, making budgeting easy. No matter what your business does, Notel has a team of highly skilled individuals to work with you creating and maintaining all of your business phone and IT needs.

Customized to your needs.

Notel will work hard with you and provide a free analysis for you to determine the best systems for your needs. We will customise features for your business, whether it be phone services or IT, connectivity, or security issues. All of your services are integrated and delivered through a single state of the art enterprise device.

We make it simple.

Because all services are delivered into one box, setup costs are minimal and monthly fees are low. Changes to your system is also kept to a minimum charge because everything is done seamlessly and with great simplicity.
